

Steps for Connecting Lingnan Library Wireless LAN Service (Lingnan Library) – Android

- **First time users: Please complete step 1 to step 6.**
- **For users who have already configured the “Lingnan Library” SSID profile in your Android device, please complete step 4 to step 6.**
- **The configuration screens and steps may be different between different Android versions and manufacturers.**

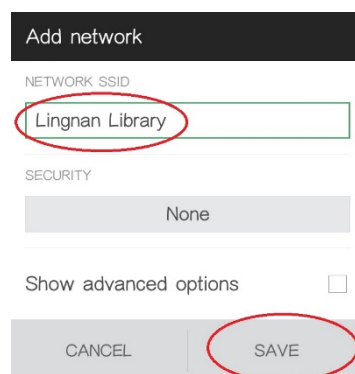

1. Click the “Wi-Fi” in Settings menu and make sure that your Android device’s Wi-Fi has been turned ON.

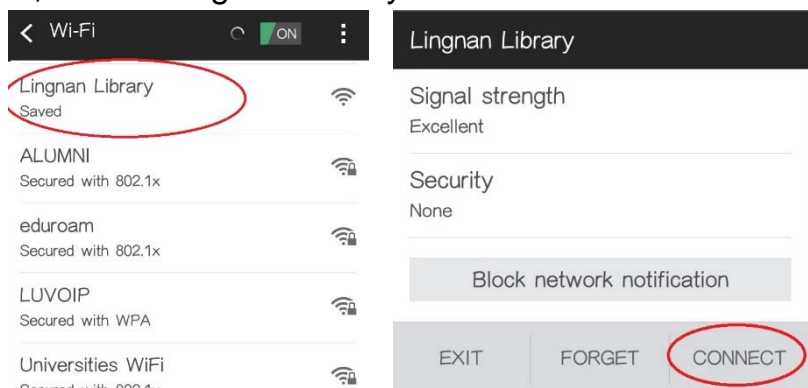

2. Click the “Setting” icon  and select “Add network”.

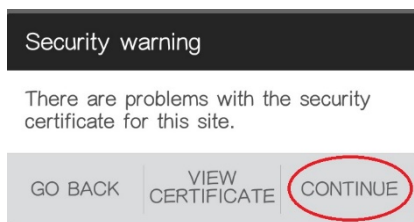

3. In the “Add network” box, type in “Lingnan Library” for Network SSID and set Security type to “None”. Click “Save” to continue.

4. In Wi-Fi menu, select “Lingnan Library” and click “CONNECT”.

5. After connecting to the “Lingnan Library” wireless network, open an Internet browser and enter any URL such as <http://www.library.ln.edu.hk>. The Security warning will appear and click “CONTINUE”.

6. The login page will be displayed. Please input the User Name, Password obtained from the Integrated Helpdesk at the Chiang Chen Information Commons and click “Submit” to establish the Wireless LAN connection.
